Marseille along the coast

Sainte-Baume Grotto requires a walk as it sits high up on a cliff. Grotto means cave and this natural cave has both a chapel and a monastery.

It is considered one of the most ancient pilgrimage sites in the Christian world, and they tout it as the place where Magdalene spent the last thirty years of her life. In a series of intimate channeled sessions, you will hear how they lived, what they taught and more about their community they built.

From the base of the trail, we'll hike up to the site, which is roughly a 45 minute walk and includes 150 steps to the monastery and cave. Returning, we can take a wider and less steep route back down. The Kings Path, "Chemin des Rois" was named after the royals who walked on this path during their pilgrimage. (Francis I, Anne of Austria, Louis XIV).

We'll have a picnic at the site as well as an interactive session with Miriam, where she and Yeshua will also guide us in a meditation as well as biofield activations and attunements.
